Nano-zinc oxide incorporated graphene oxide/ nanocellulose composite for the adsorption and photo catalytic degradation of ciprofloxacin hydrochloride from aqueous solutions

T.S. Anirudhan, J.R. Deepa

PII: S0021-9797(16)30919-5  
DOI: <http://dx.doi.org/10.1016/j.jcis.2016.11.042>  
Reference: YJCIS 21770

To appear in: *Journal of Colloid and Interface Science*

Received Date: 21 August 2016  
Revised Date: 24 October 2016  
Accepted Date: 12 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Nano-zinc oxide incorporated graphene oxide/ nanocellulose composite for the adsorption and photo catalytic degradation of ciprofloxacin hydrochloride from aqueous solutions**

T. S. Anirudhan\*, J.R. Deepa
