Title: Synthesis and Characterization of Poly(vinylidene fluoride) Membrane Containing hydrophobic silica nanoparticles for CO₂ absorption from CO₂/N₂ using membrane contactor

Authors: Azadeh Ghaee, Ali Ghadimi, Behrouz Sadatnia, Ahmad Fauzi Ismail, Zahra Mansourpour, Mohammad Khosravi

PII: S0263-8762(17)30085-0
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2017.01.032>
Reference: CHERD 2562

To appear in:

Received date: 20-6-2016
Revised date: 11-12-2016
Accepted date: 31-1-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Synthesis and Characterization of Poly(vinylidene fluoride) Membrane Containing hydrophobic silica nanoparticles for CO₂ absorption from CO₂/N₂ using membrane contactor
