

Accepted Manuscript

Title: Design of Liquid-Liquid Separation Hydrocyclones using Parabolic and Hyperbolic Swirl Chambers for Efficiency Enhancement

Authors: Abdul Motin, André Bénard

PII: S0263-8762(17)30194-6
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2017.04.012>
Reference: CHERD 2649

To appear in:

Received date: 27-10-2016
Revised date: 7-3-2017
Accepted date: 6-4-2017

Please cite this article as: Motin, Abdul, Bénard, André, Design of Liquid-Liquid Separation Hydrocyclones using Parabolic and Hyperbolic Swirl Chambers for Efficiency Enhancement. Chemical Engineering Research and Design <http://dx.doi.org/10.1016/j.cherd.2017.04.012>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Design of Liquid-Liquid Separation Hydrocyclones using Parabolic and Hyperbolic Swirl Chambers for Efficiency Enhancement

Abdul Motin* and André Bénard

Department of Mechanical Engineering; Michigan State University, East Lansing, MI, USA
