Title: A grey wolf optimizer-based support vector machine for the solubility of aromatic compounds in supercritical carbon dioxide

Authors: Xiao-Qiang Bian, Qian Zhang, Lu Zhang, Jing Chen

PII: S0263-8762(17)30287-3
DOI: <http://dx.doi.org/doi:10.1016/j.cherd.2017.05.008>
Reference: CHERD 2680

To appear in:

Received date: 10-11-2016
Revised date: 15-4-2017
Accepted date: 14-5-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Original version of the second revised manuscript**A grey wolf optimizer-based support vector machine for the solubility of aromatic compounds in supercritical carbon dioxide**

Highlights:

- A new meta-heuristic (grey wolf optimizer) method was used for parameter optimization
- A grey wolf optimizer-based support vector machine was proposed for the solubility
- The proposed model is the best among previous published models considered in this work
