

## Author's Accepted Manuscript

Membrane-based detection of wetting phenomenon  
in direct contact membrane distillation

Farah Ejaz Ahmed, Boor Singh Lalia, Raed  
Hashaikeh

PII: S0376-7388(17)30569-0  
DOI: <http://dx.doi.org/10.1016/j.memsci.2017.04.035>  
Reference: MEMSCI15199

To appear in: *Journal of Membrane Science*

Received date: 27 February 2017  
Revised date: 17 April 2017  
Accepted date: 18 April 2017

This is a PDF file of an unedited manuscript that has been accepted for  
publication. As a service to our customers we are providing this early version of  
the manuscript. The manuscript will undergo copyediting, typesetting, and  
review of the resulting galley proof before it is published in its final citable form.  
Please note that during the production process errors may be discovered which  
could affect the content, and all legal disclaimers that apply to the journal pertain
