Non-thermal plasma and Fe^{2+} activated persulfate ignited degradation of aqueous crystal violet: Degradation mechanism and artificial neural network modeling

Junyang Chen, Jingwei Feng, Songsheng Lu, Zijun Shen, Yulai Du, Lu Peng, Peng Nian, Shoujun Yuan, Aiyong Zhang

PII: S1383-5866(17)32018-X

DOI: <http://dx.doi.org/10.1016/j.seppur.2017.09.016>

Reference: SEPPUR 14025

To appear in: *Separation and Purification Technology*

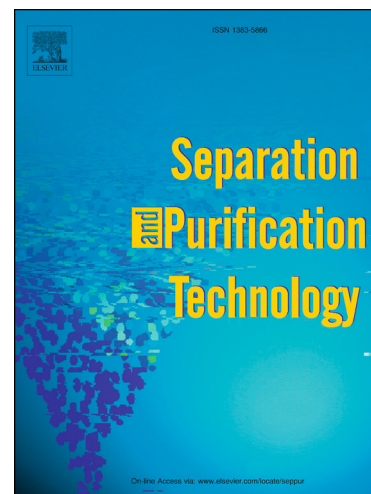

Received Date: 25 June 2017

Revised Date: 27 August 2017

Accepted Date: 5 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Non-thermal plasma and Fe^{2+} activated persulfate ignited degradation
of aqueous crystal violet: degradation mechanism and artificial neural
network modeling**
