Cross-linked mixed matrix membranes consisting of carboxyl-functionalized multi-walled carbon nanotubes and P84 polyimide for organic solvent nanofiltration (OSN)

Mohammad Hossein Davood Abadi Farahani, Dan Hua, Tai-Shung Chung

PII: S1383-5866(17)31583-6

DOI: <http://dx.doi.org/10.1016/j.seppur.2017.06.021>

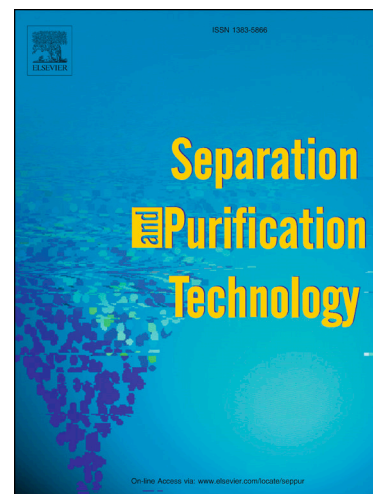

Reference: SEPPUR 13799

To appear in: *Separation and Purification Technology*

Received Date: 17 May 2017

Revised Date: 10 June 2017

Accepted Date: 10 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Cross-linked mixed matrix membranes consisting of carboxyl-
functionalized multi-walled carbon nanotubes and P84 polyimide for
organic solvent nanofiltration (OSN)**
