Research Paper

Experimental Investigation of a Novel Multi-Tank Thermal Energy Storage System for Solar-powered Air Conditioning

Sumin Jin, Liang Chen, Guangfeng Bu

PII: S1359-4311(17)31738-6

DOI: <http://dx.doi.org/10.1016/j.applthermaleng.2017.05.160>

Reference: ATE 10475

To appear in: *Applied Thermal Engineering*

Received Date: 14 March 2017

Revised Date: 21 May 2017

Accepted Date: 27 May 2017

Please cite this article as: S. Jin, L. Chen, G. Bu, Experimental Investigation of a Novel Multi-Tank Thermal Energy Storage System for Solar-powered Air Conditioning, *Applied Thermal Engineering* (2017), doi: <http://dx.doi.org/10.1016/j.applthermaleng.2017.05.160>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Experimental Investigation of a Novel Multi-Tank Thermal Energy Storage System for Solar-powered Air Conditioning
