

Accepted Manuscript

Performance of a Finned, Latent-Heat Storage System for Solar Thermal Power Application

M.D. Muhammad, O. Badr

PII: S1359-4311(17)30744-5

DOI: <http://dx.doi.org/10.1016/j.applthermaleng.2017.02.006>

Reference: ATE 9886

To appear in: *Applied Thermal Engineering*

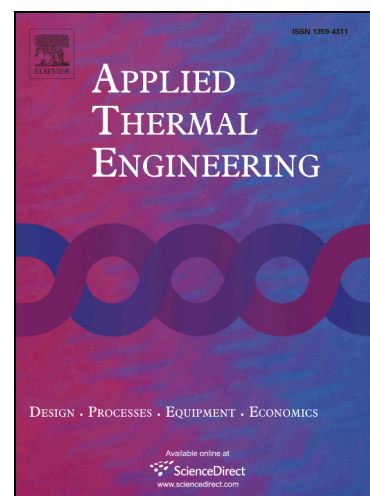

Received Date: 18 March 2016

Revised Date: 26 August 2016

Accepted Date: 3 February 2017

Please cite this article as: M.D. Muhammad, O. Badr, Performance of a Finned, Latent-Heat Storage System for Solar Thermal Power Application, *Applied Thermal Engineering* (2017), doi: <http://dx.doi.org/10.1016/j.applthermaleng.2017.02.006>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Performance of a Finned, Latent-Heat Storage System for Solar Thermal Power Application

M. D. Muhammad¹ and O. Badr

Energy and Power Engineering Division, School of Energy Environment and AgriFood, Cranfield University, Cranfield, Bedfordshire, MK43 0AL, UK.
