This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Title: Understanding the effect of operating conditions on thermal stratification and heat release in a homogeneous charge compression ignition engine

Authors: Benjamin Lawler¹, Sotirios Mamalis¹, Satyum Joshi², Joshua Lacey³, Orgun Guralp⁴, Paul Najt⁴, and Zoran Filipi⁵
