

## Accepted Manuscript

Smooth printing of viscoelastic microfilms with a flow focusing ejector

A. Ponce-Torres, E.J. Vega, A.A. Castrejón-Pita, J.M. Montanero

PII: S0377-0257(17)30296-3  
DOI: [10.1016/j.jnnfm.2017.09.004](https://doi.org/10.1016/j.jnnfm.2017.09.004)  
Reference: JNNFM 3930

To appear in: *Journal of Non-Newtonian Fluid Mechanics*

Received date: 21 June 2017  
Revised date: 12 September 2017  
Accepted date: 13 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- We design a device to produce viscoelastic jets based on flow focusing.
- Clogging does not occur in this ejector.
- The Weber number characterizing the jet is very small.
- We show the ejector capabilities by printing lines of PEDOT:PSS and PVP.
