Title: Formation of more efficient thermally conductive pathways due to the synergistic effect of boron nitride and alumina in poly(3-hydroxybutyrate)

Authors: Zonglin Li, Dandan Ju, Lijing Han, Lisong Dong

PII: S0040-6031(17)30057-6
DOI: <http://dx.doi.org/doi:10.1016/j.tca.2017.03.006>
Reference: TCA 77697

To appear in: *Thermochemica Acta*

Received date: 14-11-2016
Revised date: 6-3-2017
Accepted date: 7-3-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Formation of more efficient thermally conductive pathways due to the synergistic effect of boron nitride and alumina in poly(3-hydroxybutyrate)
