Title: Enhancement of the functional properties of *Dioscoreaceas* native starches: mixture as a green modification process

Authors: Polyanna Silveira Hornung, Suelen Ávila, Marcelo Lazzarotto, Simone Rosa da Silveira Lazzaroto, Geisa Liandra de Andrade de Siqueira, Egon Schnitzler, Rosemary Hoffmann Ribani

PII: S0040-6031(17)30006-0
DOI: <http://dx.doi.org/doi:10.1016/j.tca.2017.01.006>
Reference: TCA 77666

To appear in: *Thermochemica Acta*

Received date: 4-11-2016
Revised date: 29-12-2016
Accepted date: 13-1-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

The modification shifted the thermal resistance of the native starches by $\cong 17$ °C.

The enthalpy to gelatinise the native starches was considerably reduced.

The starch paste characteristics were improved by the mixture proportions utilised.
