Enhancement of solvent production by overexpressing key genes of the Acetone-Butanol-Ethanol fermentation pathway in *Clostridium saccharoperbutylacetonicum* N1-4

Shaohua Wang, Sheng Dong, Yi Wang

PII: S0960-8524(17)31572-9

DOI: <http://dx.doi.org/10.1016/j.biortech.2017.09.024>

Reference: BITE 18852

To appear in: *Bioresource Technology*

Received Date: 4 August 2017

Revised Date: 3 September 2017

Accepted Date: 4 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Enhancement of solvent production by overexpressing key genes of the Acetone-
Butanol-Ethanol fermentation pathway in *Clostridium saccharoperbutylacetonicum*
N1-4**
