Predictive modeling to de-risk bio-based manufacturing by adapting to variability in lignocellulosic biomass supply

Akash Narani, Phil Coffman, James Gardner, Chenlin Li, Allison E. Ray, Damon S. Hartley, Allison Stettler, N.V.S.N. Murthy Konda, Blake Simmons, Todd Pray, Deepti Tanjore

PII: S0960-8524(17)31060-X
DOI: <http://dx.doi.org/10.1016/j.biortech.2017.06.156>
Reference: BITE 18393

To appear in: *Bioresource Technology*

Received Date: 29 April 2017
Revised Date: 27 June 2017
Accepted Date: 28 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Predictive modeling to de-risk bio-based manufacturing by adapting to
variability in lignocellulosic biomass supply
