Wet *in-situ* transesterification of microalgae using ethyl acetate as a co-solvent and reactant

Jeongseok Park, Bora Kim, Yong K. Chang, Jae W. Lee

PII: S0960-8524(17)30047-0
DOI: <http://dx.doi.org/10.1016/j.biortech.2017.01.027>
Reference: BITE 17522

To appear in: *Bioresource Technology*

Received Date: 15 November 2016
Revised Date: 11 January 2017
Accepted Date: 12 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Wet *in-situ* transesterification of microalgae using ethyl acetate as a co-solvent and reactant
