Response of anodic biofilm and the performance of microbial fuel cells to different discharging current densities

Jun Li, Hejing Li, Jili Zheng, Liang Zhang, Qian Fu, Xun Zhu, Qiang Liao

PII: S0960-8524(17)30206-7
DOI: <http://dx.doi.org/10.1016/j.biortech.2017.02.083>
Reference: BITE 17655

To appear in: *Bioresource Technology*

Received Date: 5 January 2017
Revised Date: 16 February 2017
Accepted Date: 17 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Response of anodic biofilm and the performance of microbial fuel cells to
different discharging current densities**
