

Accepted Manuscript

The effects of autohydrolysis pretreatment on the structural characteristics, adsorptive and catalytic properties of the activated carbon prepared from *Eucommia ulmoides* Oliver based on a biorefinery process

Ming-Qiang Zhu, Zhi-Wen Wang, Jia-Long Wen, Ling Qiu, Ya-Hong Zhu, Yin-Quan Su, Qin Wei, Run-Cang Sun

PII: S0960-8524(17)30145-1
DOI: <http://dx.doi.org/10.1016/j.biortech.2017.02.033>
Reference: BITE 17601

To appear in: *Bioresource Technology*

Received Date: 27 November 2016
Revised Date: 7 February 2017
Accepted Date: 8 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

The effects of autohydrolysis pretreatment on the structural characteristics, adsorptive and catalytic properties of the activated carbon prepared from *Eucommia ulmoides* Oliver based on a biorefinery process
