

## Accepted Manuscript

Enhanced bioethanol production by fed-batch simultaneous saccharification and co-fermentation at high solid loading of Fenton reaction and sodium hydroxide sequentially pretreated sugarcane bagasse

Teng Zhang, Ming-Jun Zhu

PII: S0960-8524(17)30048-2

DOI: <http://dx.doi.org/10.1016/j.biortech.2017.01.028>

Reference: BITE 17523

To appear in: *Bioresource Technology*

Received Date: 28 November 2016

Revised Date: 11 January 2017

Accepted Date: 12 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Enhanced bioethanol production by fed-batch simultaneous saccharification and  
co-fermentation at high solid loading of Fenton reaction and sodium hydroxide  
sequentially pretreated sugarcane bagasse**
