Probabilistic uncertainty analysis based on Monte Carlo simulations of co-combustion of hazelnut hull and coal blends: Data-driven modeling and response surface optimization

Musa Buyukada

PII: S0960-8524(16)31560-7

DOI: <http://dx.doi.org/10.1016/j.biortech.2016.11.045>

Reference: BITE 17291

To appear in: *Bioresource Technology*

Received Date: 10 October 2016

Revised Date: 7 November 2016

Accepted Date: 11 November 2016

Please cite this article as: Buyukada, M., Probabilistic uncertainty analysis based on Monte Carlo simulations of co-combustion of hazelnut hull and coal blends: Data-driven modeling and response surface optimization, *Bioresource Technology* (2016), doi: <http://dx.doi.org/10.1016/j.biortech.2016.11.045>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Probabilistic uncertainty analysis based on Monte Carlo simulations of co-combustion of hazelnut hull and coal blends: Data-driven modeling and response surface optimization
