

## Accepted Manuscript

The impact of eco-innovation drivers on environmental performance:  
Empirical results from the green technology sector in Malaysia

Yudi Fernando, Wen Xin Wah

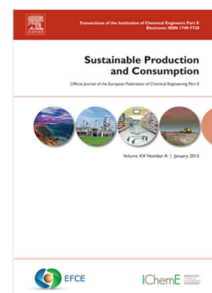

PII: S2352-5509(17)30015-5  
DOI: <http://dx.doi.org/10.1016/j.spc.2017.05.002>  
Reference: SPC 91

To appear in: *Sustainable Production and Consumption*

Received date : 17 November 2016  
Revised date : 3 May 2017  
Accepted date : 9 May 2017

Please cite this article as: Fernando, Y., Wah, W.X., The impact of eco-innovation drivers on environmental performance: Empirical results from the green technology sector in Malaysia. *Sustainable Production and Consumption* (2017), <http://dx.doi.org/10.1016/j.spc.2017.05.002>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## Highlights:

1. We have confirmed the positive link between eco-innovation drivers and environmental performance
2. Increasing regulation compliance, market focus and technology will improve environmental compliance
3. Eco-innovation fosters long-term technological and business sustainability
