Interplay between adhesion and interfacial properties of diamond films deposited on WC-10%Co substrates using a CrN interlayer

Miriam Fischer, Maneesh Chandran, Rozalia Akhvlediani, Alon Hoffman

PII: S0925-9635(16)30584-2
DOI: doi: [10.1016/j.diamond.2016.10.021](https://doi.org/10.1016/j.diamond.2016.10.021)
Reference: DIAMAT 6745

To appear in: *Diamond & Related Materials*

Received date: 11 April 2016
Revised date: 21 October 2016
Accepted date: 22 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Interplay between adhesion and interfacial properties of diamond films
deposited on WC-10%Co substrates using a CrN interlayer**
