

List of reviewers for 2014

Reviewers are an integral part of the peer-reviewed process of scientific journals and without their assistance, it would be impossible to conduct an objective evaluation of submitted manuscripts. The editorial team of the ISA transactions appreciates the contribution of so many individuals who invest their time voluntarily and assist us in critical evaluation of submitted papers to the journal. Our thanks go to the following reviewers who contributed as reviewers in 2014 (as of November 25th).
