

Accepted Manuscript

A convolutional neural network based feature learning and fault diagnosis method for the condition monitoring of gearbox

Luyang Jing, Ming Zhao, Pin Li, Xiaoqiang Xu

PII: S0263-2241(17)30451-7

DOI: <http://dx.doi.org/10.1016/j.measurement.2017.07.017>

Reference: MEASUR 4857

To appear in: *Measurement*

Received Date: 25 October 2016

Revised Date: 29 June 2017

Accepted Date: 12 July 2017

Please cite this article as: L. Jing, M. Zhao, P. Li, X. Xu, A convolutional neural network based feature learning and fault diagnosis method for the condition monitoring of gearbox, *Measurement* (2017), doi: <http://dx.doi.org/10.1016/j.measurement.2017.07.017>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A convolutional neural network based feature learning and fault diagnosis method for the condition monitoring of gearbox
