Title: One-step facile green synthesis of a highly fluorescent molecule through a way towards carbon dots and detection of dopamine based on *in-situ* formation of silver nanoparticles

Authors: Shenghong Yang, Xiaohan Sun, Zhaoyan Wang, Xiayan Wang, Guangsheng Guo, Qiaosheng Pu

PII: S0925-4005(17)31156-5
DOI: <http://dx.doi.org/doi:10.1016/j.snb.2017.06.137>
Reference: SNB 22608

To appear in: *Sensors and Actuators B*

Received date: 30-12-2016
Revised date: 17-6-2017
Accepted date: 19-6-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**One-step facile green synthesis of a highly fluorescent molecule
through a way towards carbon dots and detection of dopamine
based on *in-situ* formation of silver nanoparticles**

Highlights

- A highly fluorescent molecule TPCA was synthesized by a one-step green route.
- TPCA crystal was obtained without further treatment.
