Title: One step hydrothermal synthesis of nitrogen-doped graphitic quantum dots as a fluorescent sensing strategy for highly sensitive detection of metacycline in mice plasma

Authors: Chunqin Zhou, Xinxin He, Dongmei Ya, Ju Zhong, Biyang Deng

PII: S0925-4005(17)30692-5
DOI: <http://dx.doi.org/doi:10.1016/j.snb.2017.04.092>
Reference: SNB 22180

To appear in: *Sensors and Actuators B*

Received date: 7-2-2017
Revised date: 7-4-2017
Accepted date: 15-4-2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**One step hydrothermal synthesis of nitrogen-doped
graphitic quantum dots as a fluorescent sensing strategy for
highly sensitive detection of metacycline in mice plasma**
