Periodic motions generated from non-autonomous grazing dynamics

M.U. Akhmet, A. Kivılcım

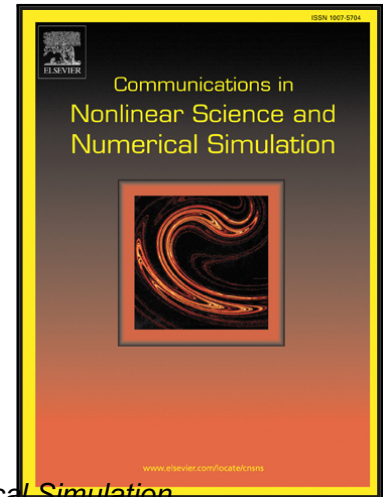

PII: S1007-5704(17)30042-4
DOI: [10.1016/j.cnsns.2017.02.002](https://doi.org/10.1016/j.cnsns.2017.02.002)
Reference: CNSNS 4109

To appear in: *Communications in Nonlinear Science and Numerical Simulation*

Received date: 28 August 2016
Revised date: 15 January 2017
Accepted date: 3 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Non-autonomous systems with non-fixed impulsive moments .
- Stationary impacts: autonomous impulse and discontinuity surface equations.
- Degenerated grazing periodic solutions.
- Regular perturbation for the grazing dynamics.
- Periodic motions of coupled impact mechanisms.
