Fractional viscoelastic beam under torsion

N. Colinas-Armijo , S. Cutrona , M. Di Paola , A. Pirrotta

PII: S1007-5704(16)30523-8
DOI: [10.1016/j.cnsns.2016.12.029](https://doi.org/10.1016/j.cnsns.2016.12.029)
Reference: CNSNS 4069

To appear in: *Communications in Nonlinear Science and Numerical Simulation*

Received date: 7 November 2016
Revised date: 14 December 2016
Accepted date: 27 December 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- An analytical formulation for the study of twisted fractional viscoelastic beams has been introduced.
- LEM a numerical method has been extended to fractional viscoelastic twisted beam.
- LEM is a robust method in such a way that can return the exact solution.
