Scrutinizing Lattice Boltzmann Methods for Direct Numerical Simulations of Turbulent Channel Flows

M. Gehrke, C.F. Janßen, T. Rung

PII: S0045-7930(17)30243-8
DOI: [10.1016/j.compfluid.2017.07.005](https://doi.org/10.1016/j.compfluid.2017.07.005)
Reference: CAF 3538

To appear in: *Computers and Fluids*

Received date: 31 March 2017
Revised date: 1 June 2017
Accepted date: 4 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- LBM for DNS of turbulent flows without compromising the domain size or Mach number.
- Performance study in adequate and under-resolved conditions.
- Comprehensive investigation of different types of LBM collision models.
