Computational free-surface fluid–structure interaction with application to floating offshore wind turbines

J. Yan, A. Korobenko, X. Deng, Y. Bazilevs

PII: S0045-7930(16)30053-6  
DOI: [10.1016/j.compfluid.2016.03.008](https://doi.org/10.1016/j.compfluid.2016.03.008)  
Reference: CAF 3114

To appear in: *Computers and Fluids*

Received date: 27 January 2016  
Revised date: 3 March 2016  
Accepted date: 5 March 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Highlights**

- A novel free-surface FSI formulation is proposed
- An efficient computational algorithm for free-surface FSI is outlined
- A numerical wave generation procedure is described
- FSI simulations of full-scale floating wind turbine are presented
