

# Accepted Manuscript

A pattern recognition system based on acoustic signals for fault detection on composite materials

Ronald Julian O'Brien, Juan Manuel Fontana, Nicolás Ponso, Leonardo Molisani

PII: S0997-7538(17)30048-7

DOI: [10.1016/j.euromechsol.2017.01.007](https://doi.org/10.1016/j.euromechsol.2017.01.007)

Reference: EJMSOL 3398

To appear in: *European Journal of Mechanics / A Solids*

Received Date: 22 June 2016

Revised Date: 22 December 2016

Accepted Date: 21 January 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

## A Pattern Recognition System Based on Acoustic Signals for Fault Detection on Composite Materials
