

## Accepted Manuscript

Uniaxial fracture test of freestanding pristine graphene using *in situ* tensile tester under scanning electron microscope

Bongkyun Jang, Alexander E. Mag-isa, Jae-Hyun Kim, Byungwoon Kim, Hak-Joo Lee, Chung-Seog Oh, Takashi Sumigawa, Takayuki Kitamura

PII: S2352-4316(16)30178-X

DOI: <http://dx.doi.org/10.1016/j.eml.2016.11.001>

Reference: EML 233

To appear in: *Extreme Mechanics Letters*

Received date: 23 August 2016

Revised date: 21 October 2016

Accepted date: 1 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
