Ton-scale metal-carbon nanotube composite: The mechanism of strengthening while retaining tensile ductility

Kang Pyo So, Xiaohui Liu, Hideki Mori, Akihiro Kushima, Jong Gil Park, Hyoung Seop Kim, Shigenobu Ogata, Young Hee Lee, Ju Li

PII: S2352-4316(16)30096-7

DOI: <http://dx.doi.org/10.1016/j.eml.2016.04.002>

Reference: EML 157

To appear in: *Extreme Mechanics Letters*

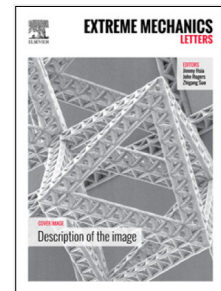

Received date: 3 January 2016

Revised date: 6 April 2016

Accepted date: 11 April 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Ton-scale Metal-Carbon Nanotube Composite: the Mechanism of Strengthening while Retaining Tensile Ductility
