FEM-simulation of machining induced surface plastic deformation and microstructural texture evolution of Ti-6Al-4V alloy

Anhai Li, Jiming Pang, Jun Zhao, Jian Zang, Fuzeng Wang

PII: S0020-7403(17)30418-6  
DOI: <http://dx.doi.org/10.1016/j.ijmecsci.2017.02.014>  
Reference: MS3599

To appear in: *International Journal of Mechanical Sciences*

Received date: 4 July 2016  
Revised date: 8 February 2017  
Accepted date: 17 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# **FEM-simulation of machining induced surface plastic deformation and microstructural texture evolution of Ti-6Al-4V alloy**
