Failure prediction of AZ31B magnesium alloy sheet based on a micro-mechanical void model incorporating the asymmetric plasticity constitutive law

Dae-Young Kim, Myoung-Gyu Lee, Chung An Lee, Ngoc-Trung Nguyen, Heon Young Kim

PII: S0749-6419(16)30262-5

DOI: [10.1016/j.ijplas.2016.10.011](https://doi.org/10.1016/j.ijplas.2016.10.011)

Reference: INTPLA 2118

To appear in: *International Journal of Plasticity*

Received Date: 30 May 2016

Revised Date: 10 September 2016

Accepted Date: 29 October 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Failure prediction of AZ31B magnesium alloy sheet based on a micro-mechanical void model incorporating the asymmetric plasticity constitutive law
