Title: Exergy Analysis of Electrically- and Thermally-driven Engines to Drive Heat Pumps: An Exhaustive Comparative Study

Author: Moonis R. Ally, Vishaldeep Sharma, Omar Abdelaziz

PII: S0140-7007(17)30063-4

DOI: <http://dx.doi.org/doi: 10.1016/j.ijrefrig.2017.02.011>

Reference: IJIR 3555

To appear in: *International Journal of Refrigeration*

Received date: 25-10-2016

Revised date: 27-12-2016

Accepted date: 11-2-2017

Please cite this article as: Moonis R. This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Exergy Analysis of Electrically- and Thermally-driven Engines to Drive Heat Pumps: An Exhaustive Comparative Study[☆]

Moonis R. Ally¹, Vishaldeep Sharma, Omar Abdelaziz

Energy and Transportation Sciences Division, Oak Ridge National Laboratory, Oak Ridge, Tennessee 37831

Highlights

- Compares electrically- and thermally-driven heat engines to drive heat pumps
- Which engine may be a better choice for a given application
- Detailed energy and exergy analysis to support the conclusions
- Extensive cross checks of the results from analysis
