Experimental investigation on tensile properties of carbon nanotube wires

Dan Li , Qing-Sheng Yang , Xia Liu , Jun-Jun Shang

PII: S0167-6636(16)30136-3
DOI: [10.1016/j.mechmat.2016.11.010](https://doi.org/10.1016/j.mechmat.2016.11.010)
Reference: MECMAT 2674

To appear in: *Mechanics of Materials*

Received date: 8 July 2016
Revised date: 2 November 2016
Accepted date: 30 November 2016

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- Tensile experiments of CNT wires are carried out.
- Elasto-plastic properties of CNT wires are obtained.
- Plastic features and failure modes are illustrated.
