Title: Structural weight minimization under stress constraints and multiple loading

Author: Renatha B. Santos Cinthia G. Lopes Antonio A. Novotny

PII: S0093-6413(17)30074-5
DOI: <http://dx.doi.org/doi:10.1016/j.mechrescom.2017.02.005>
Reference: MRC 3145

To appear in:

Received date: 9-3-2016
Revised date: 8-1-2017
Accepted date: 6-2-2017

Please cite this article as: Renatha B. Santos, Cinthia G. Lopes, Antonio A. Novotny, Structural weight minimization under stress constraints and multiple loading, *Mechanics Research Communications* (2017), <http://dx.doi.org/10.1016/j.mechrescom.2017.02.005>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

- Structural weight minimization under local stress constraints and multiple loading.
- Efficient and simple approach based on the topological derivative concept.
- Alternative method free of material model and interpolation schemes.
