

Accepted Manuscript

Title: Generalized Design Method of Highly-Variied-Helix End Mills for Suppression of Regenerative Chatter in Peripheral Milling

Author: Takehiro Hayasaka Atsushi Ito Eiji Shamoto

PII: S0141-6359(16)30304-X
DOI: <http://dx.doi.org/doi:10.1016/j.precisioneng.2016.11.004>
Reference: PRE 6480

To appear in: *Precision Engineering*

Received date: 6-7-2016
Revised date: 29-9-2016
Accepted date: 14-10-2016

Please cite this article as: Hayasaka Takehiro, Ito Atsushi, Shamoto Eiji. Generalized Design Method of Highly-Variied-Helix End Mills for Suppression of Regenerative Chatter in Peripheral Milling. *Precision Engineering* <http://dx.doi.org/10.1016/j.precisioneng.2016.11.004>

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Generalized Design Method of Highly-Variied-Helix End Mills for Suppression of Regenerative Chatter in Peripheral Milling

Takehiro Hayasaka^a, Atsushi Ito^{b,*}, and Eiji Shamoto^a
