

Accepted Manuscript

A cost-based integrated importance measure of system components for preventive maintenance

Hongyan Dui , Shubin Si , Richard C.M. Yam

PII: S0951-8320(16)30670-6
DOI: [10.1016/j.ress.2017.05.025](https://doi.org/10.1016/j.ress.2017.05.025)
Reference: RESS 5845

To appear in: *Reliability Engineering and System Safety*

Received date: 24 October 2016
Revised date: 17 April 2017
Accepted date: 4 May 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Highlights

- The joint effect of maintenance cost and time on the system reliability is analyzed
- A cost-based IIM is proposed, and its characteristics are explored.
- An application to a wind turbine system is used to illustrate its usage.
