Accepted Manuscript

Biomechanical evaluation of pedicle screw fixation system in spinal adjacent levels using polyetheretherketone, carbon-fiber-reinforced polyetheretherketone, and traditional titanium as rod materials

Kyoung-Tak Kang, Yong-Gon Koh, Juhyun Son, Jin S. Yeom, Joon-Hee Park, Ho-Joong Kim

PII: S1359-8368(17)30215-9

DOI: 10.1016/j.compositesb.2017.07.052

Reference: JCOMB 5188

To appear in: Composites Part B

Received Date: 18 January 2017

Revised Date: 19 May 2017

Accepted Date: 29 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
