Enhanced interfacial interaction and excellent performance of silica/epoxy group-functionalized styrene-butadiene rubber (SBR) nanocomposites without any coupling agent

He Qiao, Mingyuan Chao, David Hui, Jun Liu, Junchi Zheng, Weiwei Lei, Xinxin Zhou, Runguo Wang, Liqun Zhang

PII: S1359-8368(16)32696-8

DOI: [10.1016/j.compositesb.2017.02.021](https://doi.org/10.1016/j.compositesb.2017.02.021)

Reference: JCOMB 4904

To appear in: *Composites Part B*

Received Date: 14 November 2016

Revised Date: 15 December 2016

Accepted Date: 11 February 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
