

# Accepted Manuscript

Shell elements with through-the-thickness variable kinematics for the analysis of laminated composite and sandwich structures

E. Carrera, A. Pagani, S. Valvano

PII: S1359-8368(16)32548-3

DOI: [10.1016/j.compositesb.2016.12.001](https://doi.org/10.1016/j.compositesb.2016.12.001)

Reference: JCOMB 4756

To appear in: *Composites Part B*

Received Date: 1 November 2016

Accepted Date: 1 December 2016

Please cite this article as: Carrera E, Pagani A, Valvano S, Shell elements with through-the-thickness variable kinematics for the analysis of laminated composite and sandwich structures *Composites Part B* (2017), doi: 10.1016/j.compositesb.2016.12.001.

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

# Shell elements with through-the-thickness variable kinematics for the analysis of laminated composite and sandwich structures

E. Carrera, A. Pagani, S. Valvano
