Accepted Manuscript

Fracture toughness (Mode I) characterization of SiO_2 nanoparticle filled basalt/epoxy filament wound composite ring with split-disk test method

Mehmet Turan Demirci, Necmettin Tarakçıoğlu, Ahmet Avcı, Ahmet Akdemir, İbrahim Demirci

PII: S1359-8368(16)32519-7

DOI: 10.1016/j.compositesb.2017.03.045

Reference: JCOMB 4979

To appear in: *Composites Part B*

Received Date: 31 October 2016

Revised Date: 4 March 2017

Accepted Date: 19 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.
