Reactor granule technology for fabrication of functionally advantageous polypropylene nanocomposites with oxide nanoparticles

Bulbul Maira, Patchanee Chammingkwan, Minoru Terano, Toshiaki Taniike

PII: S0266-3538(17)30071-4

DOI: [10.1016/j.compscitech.2017.03.026](https://doi.org/10.1016/j.compscitech.2017.03.026)

Reference: CSTE 6711

To appear in: *Composites Science and Technology*

Received Date: 10 January 2017

Revised Date: 10 March 2017

Accepted Date: 16 March 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

**Reactor Granule Technology for Fabrication of Functionally Advantageous  
Polypropylene Nanocomposites with Oxide Nanoparticles**
