High resolution residual stress gradient characterization in W/TiN-stack on Si(100): Correlating in-plane stress and grain size distributions in W sublayer

René Hammer, Juraj Todt, Jozef Keckes, Bernhard Sartory, Georg Parteder, Jochen Kraft, Stefan Defregger

PII: S0264-1275(17)30641-X
DOI: doi: [10.1016/j.matdes.2017.06.052](https://doi.org/10.1016/j.matdes.2017.06.052)
Reference: JMADE 3170

To appear in: *Materials & Design*

Received date: 25 April 2017
Revised date: 7 June 2017
Accepted date: 21 June 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

High Resolution Residual Stress Gradient Characterization in W/TiN-Stack on Si(100): Correlating In-Plane Stress and Grain Size Distributions in W Sublayer
