

## Accepted Manuscript

Porous scaffold internal architecture design based on minimal surfaces: A compromise between permeability and elastic properties

H. Montazerian, E. Davoodi, M. Asadi-Eydivand, J. Kadkhodapour, M. Solati-Hashjin

PII: S0264-1275(17)30359-3  
DOI: doi: [10.1016/j.matdes.2017.04.009](https://doi.org/10.1016/j.matdes.2017.04.009)  
Reference: JMADE 2931

To appear in: *Materials & Design*

Received date: 29 January 2017  
Revised date: 3 April 2017  
Accepted date: 4 April 2017

Please cite this article as: H. Montazerian, E. Davoodi, M. Asadi-Eydivand, J. Kadkhodapour, M. Solati-Hashjin, Porous scaffold internal architecture design based on minimal surfaces: A compromise between permeability and elastic properties. The address for the corresponding author was captured as affiliation for all authors. Please check if appropriate. *Jmade*(2017), doi: [10.1016/j.matdes.2017.04.009](https://doi.org/10.1016/j.matdes.2017.04.009)

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

***Porous scaffold internal architecture design based on minimal surfaces: A compromise between permeability and elastic properties***
