

Author's Accepted Manuscript

A fully automated microfluidic-based electrochemical sensor for real-time bacteria detection

Zeynep Altintas, Mete Akgun, Guzin Kokturk, Yildiz Uludag

PII: S0956-5663(17)30654-1
DOI: <https://doi.org/10.1016/j.bios.2017.09.046>
Reference: BIOS10020

To appear in: *Biosensors and Bioelectronic*

Received date: 25 July 2017
Revised date: 19 September 2017
Accepted date: 26 September 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting galley proof before it is published in its final citable form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

A fully automated microfluidic-based electrochemical sensor for real-time bacteria detection

Zeynep Altintas^{1*}, Mete Akgun², Guzin Kokturk², Yildiz Uludag²
