This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Validation of a Smart Shoe for Estimating Foot Progression Angle during Walking Gait

Running Title: Smart shoe for foot progression angle

Haisheng Xia ^a, Junkai Xu ^a, Jianren Wang ^a, Michael A. Hunt ^b, Peter B. Shull ^a

Keywords: wearable sensing, sensorized shoe, knee osteoarthritis

All authors have made substantial contributions to the following: (1) the conception and design of the study, or acquisition of data, or analysis and interpretation of data, (2) drafting the article or revising it critically for important intellectual content, (3) final approval of the version to be submitted. Each of the authors has read and concurs with the content in the manuscript. The manuscript and the material within have not been and will not be submitted for publication elsewhere.
