Crosslinked elastic fibers are necessary for low energy loss in the ascending aorta

Jungsil Kim, Marius Catalin Staiculescu, Austin J. Cocciolone, Hiromi Yanagisawa, Robert P. Mecham, Jessica E. Wagenseil

PII: S0021-9290(17)30370-6
DOI: <http://dx.doi.org/10.1016/j.jbiomech.2017.07.011>
Reference: BM 8299

To appear in: *Journal of Biomechanics*

Received Date: 29 January 2017
Revised Date: 30 June 2017
Accepted Date: 16 July 2017

This is a PDF file of an unedited manuscript that has been accepted for publication. As a service to our customers we are providing this early version of the manuscript. The manuscript will undergo copyediting, typesetting, and review of the resulting proof before it is published in its final form. Please note that during the production process errors may be discovered which could affect the content, and all legal disclaimers that apply to the journal pertain.

Crosslinked elastic fibers are necessary for low energy loss in the ascending aorta
